

> Handrails

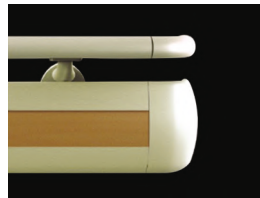

The AMSON handrails are tough and can withstand impact from hospital furniture like trolleys and other equipment. To ensure safety needs of the patient there are various design options available. These handrails are available in various design and colours to suit an architect's planning of aesthetics.

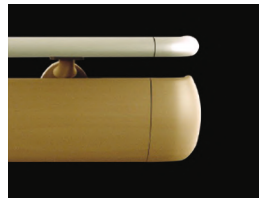

These handrails are easy and fast to install and will avoid any need to re-paint the walls.

Grab Bars

AMSON Anti-slip-safety grab bars consist of non-slip finish surfaces which ensure a secured grip for patient access. This is useful for the senior citizens and children using the bathroom in a hospital environment. It is a true combination of safety, style and functionality. To ensure an elegant look all screws are concealed. It provides long life durability.
